

Reduce the Financial Impact of Opioid Abuse

HEALTH INSURANCE PAYERS

The opioid epidemic is having a profound economic impact on payers. In five years, claims charged to insurance companies to treat opioid dependence or abuse increased nearly 1,000%. Opioid abuse costs insurers almost \$16,000 more per patient per year. The Rx Locking Cap offers a low-cost solution to the rising costs of opioid abuse for payers.

Add the RX Locking Cap to your formulary

Rx Locking Cap secures schedule II - V drugs

Save up to \$16,000 per patient per year

Low-cost to implement:
average \$3/ per unit for payers

“Innovation in packaging, storage, and disposal could have a meaningful impact on preventing or deterring misuse, abuse, or inappropriate access to prescription opioids.”

- FDA Commissioner Scott Gottlieb, M.D.

Improve Your Bottom Line

ASK YOUR PBM ABOUT THE RX LOCKING CAP PROGRAM

PHARMACY BENEFIT MANAGERS (PBM)

Pharmacy benefit managers add rx medications and medical devices like the Rx Locking Cap to their formularies, making those products available to all of their health insurance partners.

PHARMACIES

Once a PBM has added a rx medication or medical device to the formulary, it is available for pharmacies to dispense to patients. The Rx Locking Cap fits existing pharmaceutical bottles.

PATIENTS

Opioids and other schedule II drugs are distributed to patients with the Rx Locking Cap to help reduce misuse, diversion, and accidents. The payer covers the cost to keep patients safer.
